

Saving lives through better surgery!

SurgAR is looking for a Network and Quality Assurance Engineer

Looking for an ultra-stimulating ground to boost your career? Looking for a challenge that can have a direct impact on the quality of patient care? Send your CV to cecile@surgar-surgery.com

Why join us ?

SurgAR is a growing startup working on the development of augmented reality software for minimally invasive laparoscopic surgery. SurgAR is a 2019 winner of the prestigious i-Lab competition (best innovative company projects) and a 2020 winner of several national and international calls for proposals. It has a strong partnership with an internationally recognised surgery department and a computer vision laboratory leader in its field. SurgAR is based in Clermont-Ferrand where the quality of life excels!

Our software suite is based on cutting-edge technology dedicated to improving the safety, efficiency and speed of the operating procedure. Our technology is a deep-tech based on more than 10 years of fundamental and clinical research. On our website www.surgar-surgery.com you will discover the performance of our technology. More than 50 patients have been operated using our software suite. We aspire to create breakthrough technology that will change the practice of surgeons. We are ready for the market but we need your help to get there!

The job offer is a real challenge but you will work at the heart of a small management team in full collaboration with the R&D department and clinicians. We strongly value the ethical aspect of the company and its employees. **We have a mission: come to help us!**

The job?

Your main missions will be to resolve technical issues in connecting our hardware to the laparoscopic material, to establish a list of compatible laparoscopic material, to resolve technical issues in connecting our hardware to the hospital network and outside (tests, verify connection options), to perform software user testing and to perform the maintenance and troubleshooting at client sites.

You?

You have knowledge and experience in web network ; you also have knowledge in different video connectors and their conversions ; you have experience in local area network. Knowledge of regulatory and quality standards would also be appreciated.

You have a perfect mastery of oral and written technical English.

You are known for your rigour and autonomy, you have good ability to integrate into a team, you are motivated to complete a project on time and to work under strict deadlines, you are eager to learn new concepts: you are the one!

SurgAR is THE startup that will revolutionise tomorrow's surgery!
Be part of this revolution! Join us!
